

The figure displays two side-by-side box plots representing the distribution of data points for two groups: blue and orange. The blue box plot on the left shows a median around 0.5, with a box spanning from approximately 0.4 to 0.6. The orange box plot on the right shows a median around 0.75, with a box spanning from approximately 0.65 to 0.85. Both distributions exhibit right-skewness, with several outliers extending upwards. The blue group has outliers reaching up to 1.0, while the orange group has outliers reaching up to 0.95.
